Inspire Your Baby

Babies are talking with their hands
before they can speak!

My Baby Can Talk™ is a series of DVDs that gives parents and babies the ability to bridge the gap between the time a baby can communicate with their hands and the time a baby can speak. Set to classical music, *First Signs* teaches babies American Sign Language (ASL) by engaging and delighting them while entertaining you at the same time! This means that you both learn together.

The Amazing Benefits of Signing with Your Baby:

- Reduces Frustration
- Boosts Self-Esteem and Confidence
- Strengthens the Bond between Baby and Parent
- Helps Babies Speak Sooner with a Larger Vocabulary
- Enhances Intelligence and Memory

"My daughter can now tell me when she is hungry, thirsty, or when she needs more of anything."
